Report for previous work done

Report

- The main sewer line was replaced approximately 18 months ago.
- We received a new call from this same client because the drain line got clogged.
- We returned to the client's property to unclog the main sewer line.
- We had to run the sewer camera to confirm the issue with the main sewer line, and it was found that the sewer pipe is collapsed in the area of the sidewalk, not on the homeowner's property.
- A mark was left on the concrete with spray paint.
- That area now belongs to the City.
- Therefore, it is suggested that the client contact the City of San Antonio offices.

The following installment payments

First Payment	<u>\$ 350.00</u>
----------------------	-------------------------
