shower valve replacement

valve replacement

• This project involves the replacement of an existing shower valve to ensure optimal performance and functionality. The water supply will be shut off before removal of the old valve. The new shower valve will be installed according to manufacturer specifications, ensuring all connections are secure and leak-free. The installation will be completed with minimal disruption, followed by a thorough test to confirm proper operation and compliance with industry standards.

The following installment payments

First Payment	<u>\$ 870.00</u>
---------------	------------------

Total Amount	<u>\$ 870.00</u>
--------------	------------------

- 1st Choice will be responsible for leaving everything working 100%
